

Norton Personal Firewall Login Issue

Some people with Norton Personal Firewall have experienced problems logging into the website. We have found that the procedure below can reset your login settings for the website.

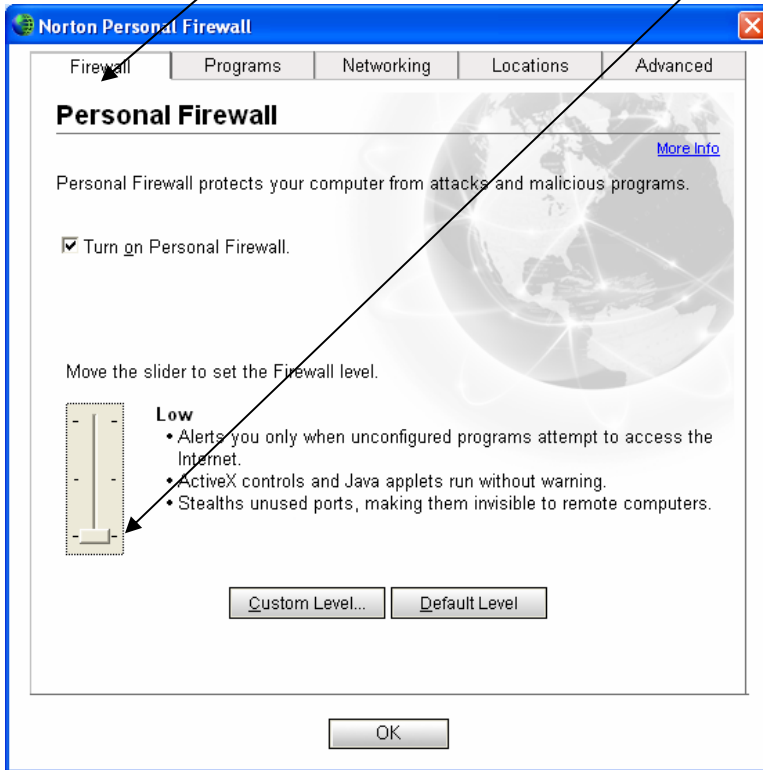

- In windows double click on the Norton Personal Firewall icon in the task bar as shown below.

- Click on Personal Firewall and configure in the window below.

- Click on the Firewall tab and move the slider to low and click ok to accept the changes. Now try to login to the HerdPlus section on the ICBF website.

- If you have successfully logged in you can reset your firewall settings back to medium as shown below.
